

VIRTUAL CYBER CONSULTANT (VCC)

A cost-effective, flexible, full-service consultancy service for medium to large enterprises with immediate cybersecurity requirements

What is a Virtual Cyber Consultant?

The Virtual Cyber Consultant (VCC) Service is a fully-remote, full-service cyber consultancy service. It has been specially designed for medium to larger businesses that have cybersecurity requirements that they need fulfilled in a short span of time. VCC offers 300+ services in over 15 cybersecurity domains.

Potential Cybersecurity requirements that need fulfilling in a short span of time

- Enhancing cybersecurity maturity and cyber resilience over time.
- Demonstrating improved cybersecurity controls to clients, management, regulators, partners etc.
- Becoming Cyber Essentials Certified.
- Aligning the business with Cybersecurity Framework and/or other standards & adopting best practices.
- Creating, reviewing or refreshing Cyber Incident Response Plans and/or Cyber Incident Response Playbooks.
- Review of your Disaster Recovery or Business Continuity Plans.
- Implementing the Risk Management Framework, including identifying assets and defining asset management processes.

Why Do You Really Need A Virtual Cyber Consultant? - Challenges to hiring full-time staff

If you are at all associated with the world of cyber, you already know that there is a severe shortage of skilled staff & it's getting worse.

Even if you end up finding someone willing to work for you, they're going to be very expensive - they're in high demand & know it.

If you manage to find someone within your budget, they'll soon get bored. Cybersecurity experts are wired to look for the next attack & smaller businesses aren't attacked that often.

Small & medium businesses aren't attacked as often, so they don't necessarily need full-time cybersecurity staff. A flexible, remote service like VCC is more appropriate & cost-effective.

What Makes Our Virtual Cyber Consultant Service Unique?

The Virtual Cyber Consultant model is affordable & specially tailored for micro & small businesses that cannot afford exorbitant consultancy fees to achieve cyber security goals. It has been designed for those businesses which have urgent cybersecurity requirements. The flexible & affordable nature of the service makes it unlike anything else in the market.

✔ Four Service Tiers

The VCC Service offers 4 Service Tiers - Silver, Gold, Platinum, and Platinum+. No matter how extensive or urgent your cybersecurity requirement may be, there is a Service Tier for you.

📌 Inclusive Services

Clients have access to many benefits and premium features including unlimited Zoom hours and access to our Cyber Incident Response Coordination and Management services as well as the option to conduct Tabletop exercises. In addition clients have access to Penetration testing and Vulnerability Assessment services.

🔗 Access to 300+ Cyber Services

The VCC Service offers you access to 300+ Cybersecurity, Governance, Risk & Compliance Services across 15 Domains. No matter what your immediate cybersecurity requirement might be, the VCC Service should be able to cover it. We also offer readymade packages including Cyber Essentials, ISO 27001, BCP & more.

6 Key Benefits of our Virtual Cyber Consultant Service

- **Significant Cost Savings:** Our VCC Service leads to considerable cost savings. Not hiring full-time staff means no recruiter fees, no contractors, no salaries, no holiday or sick pay. Urgent requirements? Not a problem as you can utilise your allocated Zoom hours in one go & buy more when required.
- **Highly-skilled practitioners:** You get access to highly-skilled cybersecurity practitioners with a wealth of cross-industry experience, at a fraction of the cost of hiring them. You are always supported by an experienced Security Consultant via Zoom calls and can ask any question you like.
- **Extension of your IT/InfoSec team:** We can either take on the role of being your Infosec team or we can offer support to your existing team. If your resources are stretched and you have an immediate cybersecurity requirement, our VCC Service is perfect for you.
- **Quick Improvement in Cybersecurity Posture:** Our VCC Service is specifically targetted at organisations looking to RAPIDLY improve their existing cybersecurity maturity and/or achieve compliance, improve risk management, governance, business continuity & Incident Response.
- **Complete Cybersecurity Assistance:** Our Virtual Cyber Consultants will help you with all your cybersecurity requirements including supplier questionnaires, Cyber Essentials, Incident Response Plans, Playbooks and much more.
- **Unparalleled Flexibility in Service:** The USP of our VCC Service is the incredible flexibility it offers. You can choose from 4 Service Tiers (Silver, Gold, Platinum & Platinum+), 300+ Services & flexible payment options to make a choice that's absolutely fit for your business.

300+ Services across 15 Service Domains

Based on our professional experience & market needs, we have reduced the complex world of cyber into 15 simple domains. Each Service Domain has associated services and activities. We can support you in one or more domains.

 Certifications & Standards	 Data Security	 Supply Chain Cybersecurity	 Governance & Compliance	 Cyber Risk Advisory	 Asset Management
